

BIOCHARGER

Enhance your energy and overall well-being with energy medicine

Science confirms the existence of a subtle energy field around all living organisms, similar to the energy field recorded using thermal imaging technology. When optimal, this energy regulates cellular functions. But if it's lacking or imbalanced, it causes cellular dysfunction, which decreases physical performance, injury recovery and overall well-being. The emerging field of energy medicine (EM) involves assessing and treating energy imbalances so that the body's systems achieve homeostasis. This builds upon the work of Nobel Prize scientist Otto Von Warburg, who discovered that normal, healthy cells have trans-membrane potentials of approximately 70 to 100 millivolts, while fatigued, sick cells exhibit progressively lower voltages, which drop to as low as 15 millivolts in the case of cancer or disease¹.

BioCharger is a subtle energy revitalization platform that uses four types of transmitted energy—light, Voltage, frequencies, harmonics and Pulsed Electro-Magnetic Fields (PEMFs)—to stimulate and invigorate the body. A touch-free, safe, rejuvenating full-body treatment, BioCharger supports the recovery of strength, stamina, coordination and mental clarity. During BioCharger sessions, members experience a customized electromagnetic field that bathes the full body in frequencies designed to restore homeostasis. Users have reported measurable improvements in energy levels, fatigue and overall well-being.

BIOCHARGER

Enhance your energy and overall well-being with energy medicine

HEALTH AND WELLNESS BENEFITS

- Boosts performance and recovery: our clients consist of Olympic and professional athletes within the NFL, World Surf League, MLB, and NBA who use the BioCharger to accelerate muscle recovery and reduce stiffness in joints
- Enhances mind-body balance: Aligns body and mind down to the cellular level
- Improves well-being: Delivers a variety of health-related benefits, including improved sleep and stress reduction²
- Increases energy: Revitalizes cells and restores homeostasis, which can impact energy levels³

CONTRAINDICATIONS

When considering BioCharger therapy, please follow these guidelines:

- Individuals with cardiac pacemakers and/or insulin pumps must sit at least 6 feet away from the BioCharger
- Individuals with photosensitivity (I.E. Photoconvulsive Response, Epilepsy, Migraines caused by Photosensitivity) should use the BioCharger without the plasma tubes installed, as the strobing nature potentially could cause an episode. Another option is to wear a suitable eye mask (sleeping mask that shuts out all light) during the session.
- Women who are pregnant should not use the BioCharger. Individuals with metal-based chemotherapy ports or other metal platings should not use the BioCharger.

For more information on the risk associated with this modality, please visit the BioCharger website ([biocharger.com](https://www.biocharger.com)).
